

H₂ONLY WHOLE OF HOUSE WATER FILTRATION SYSTEM

The H₂Only Whole of House System is a point of entry water filtration system which attaches to the main inlet pipe on the outside of the house delivering purified water to all internal outlets including showers, kitchen sink, bathrooms, laundry, etc.

Using the latest, advanced filtration technology the system comprises of twin housings incorporating a 20 inch (50cm) 5 micron Sediment Cartridge to remove particulate matter such as rust, mud and slime and a 20 inch (50cm) 5 Micron Carbon Block Cartridge to remove chemicals from the water such as chlorine, pesticides and herbicides. It is these chemicals in the water which can give mains water a bad taste and unpleasant odour.

The Carbon Block Cartridge also removes volatile organic chemicals from the water. These are synthetic chemicals which evaporate easily and can cause a risk to those prone to taking long, hot showers.

20 inch Sediment Cartridge

20 inch Sediment Cartridge

The system uses high volume 1” inlet and outlet pipes which means that there is no effect on the pressure of the water delivered from the mains supply to the internal water outlets.

In addition to providing clean, filtered water to all of your taps, the whole of house system will also assist to prolong the useful life of household appliances such as washing machines, dishwashers and hot water systems.

The expected life of the filter cartridges depends on the quality of the incoming water. In normal circumstances the cartridges will need to be replaced every 6-9 months

| Dimensions | |
|------------|---------------------|
| W | 15 ½ inches (395mm) |
| H | 24 inches (610mm) |
| D | 8 ½ inches (216mm) |

| Chemicals | % removed | Chemicals | % removed |
|----------------|-----------|-------------------|-----------|
| Adrezin | 95% | Herbicides | 95% |
| Aldrin | 95% | Lindane | 95% |
| Benzene | 95% | Perchloroethylene | 95% |
